Friday- June 28th

Pequannock High School

****Raindate Saturday June 29th**

Fireworks safety month stresses that, although fireworks are fun and exciting way to celebrate our nation's freedom, they can be harmful or even deadly if not used properly. According to Fireworksafety.com, malfunction and careless use of fireworks result in nearly 10,000 injuries every year. More than 65 percent of all fireworks –related injuries occur during the month of July.

The following are some fireworks that are legal for consumers to purchase and use in some states. Just because they are legal doesn't mean they're safe!

Sparklers

Every year, young children can be found along parade routes and at festivals with sparklers in hand, but they are a lot more dangerous than most people think. Parents don't realize they burn at 2,000 degrees– hot enough to melt some metals. Sparklers can quickly ignite clothing, and many children have received severe burns from dropping sparklers on their feet.

Bottle Rockets

These small rockets are attached to a stick, lit by a fuse and typically fired from a bottle. Teens have been known to have bottle rocket wars, firing them at one another and causing chest, head and eye injuries.

Firecrackers

Firecrackers are designed to explode on the ground. They are often linked together by one long fuse and explode in a series. They are designed to be very noisy, but they also can cause burns and other serious injuries.

Roman Candles

Roman candles eject multiple exploding shells from a tube the user holds in his or her hand. There have been numerous reports of children losing fingers, severe burns and other injuries, which are sometimes caused when the device gets jammed.

August

Public Health
Prevent. Promote. Protect.

National Immunization Awareness Month !!

Immunizations for Babies

At birth HepB

2 months HepB + DTaP + PCV13 + Hib + Polio + RV

4 months HepB2 + DTaP + PCV13 + Hib + Polio + RV

6 months HepB + DTaP + PCV13 + Hib3 + Polio + RV + Influenza

12 months MMR + DTaP + PCV13 + Hib + Chicken-pox + HepA + Influenza

Did you know ??.....

*The Health Department nurses
can provide immunizations to
Uninsured/ under insured children
& adults.*
